

VMWARE VREALIZE OPERATIONS MANAGEMENT PACK FOR

Pivotal Cloud Foundry

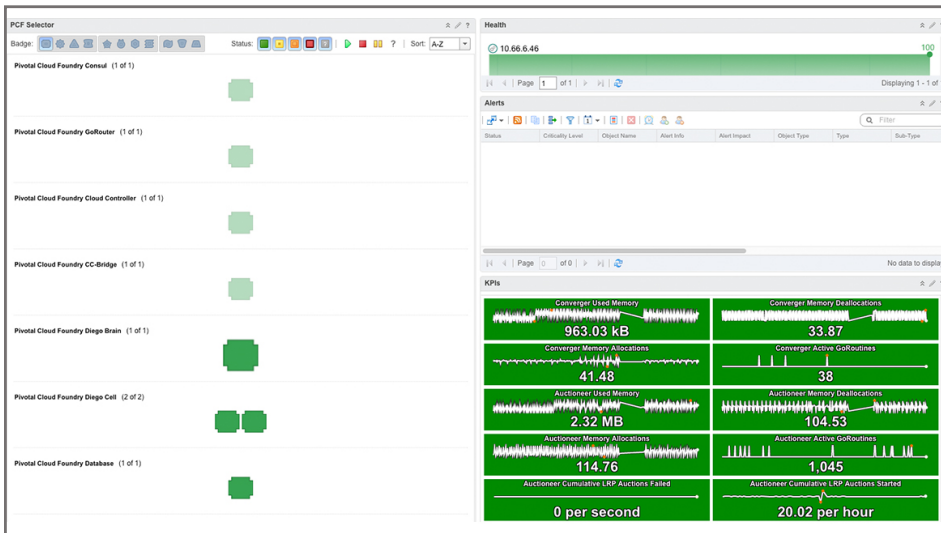

TECHNOLOGY ALLIANCE

The Management Pack for Pivotal Cloud Foundry extends the VMware vRealize Operations (vROps) monitoring platform by enabling customers to gain comprehensive visibility into the performance, capacity, and health of their Pivotal Cloud Foundry applications and containers.

Extend vRealize Operations to Pivotal Cloud Foundry

The Blue Medora vRealize Operations Management Pack for Pivotal Cloud Foundry offers visibility into resources used by applications and containers in end user's virtual environments and makes it available in vRealize Operations. With the Management Pack for Pivotal Cloud Foundry, administrators gain essential insight into their Pivotal Cloud Foundry environment within a single console.

With the vRealize Operations Management Pack for Pivotal Cloud Foundry, Pivotal Cloud Foundry customers gain visibility into the performance, capacity, and health of their Pivotal Cloud Foundry workloads.

Expose Key Pivotal Cloud Foundry Performance Metrics

- CPU
- Memory
- Dropped Messages
- Thread Connections
- Total Requests

Supported Platforms

vRealize Operations
(Enterprise Edition Only)
Version 6.x

Pivotal Cloud Foundry
(On-premises, vCloud Air, Azure)
1.6+

Additional platforms are added periodically. Visit bluemedora.com for the most up-to-date platform support.

KEY ADVANTAGES

- **End-to-end visibility.** Identify potential issues in your Pivotal Cloud Foundry environment before they spread to the next layer of the stack.
- **Health awareness.** Gain insight into the health of Pivotal Cloud Foundry with a comprehensive collection of out-of-the-box dashboards and reports.
- **Relationship mapping.** View relationships within Pivotal Cloud Foundry, out to the virtual layer and beyond.
- **Integration.** Enable seamless integration between vRealize Operations and Pivotal Cloud Foundry to optimize reporting and monitoring.

AVAILABLE NOW

This management pack is now available for purchase. Learn more and download a fully supported trial at bluemedora.com.

VMWARE VREALIZE OPERATIONS MANAGEMENT PACK FOR Pivotal Cloud Foundry

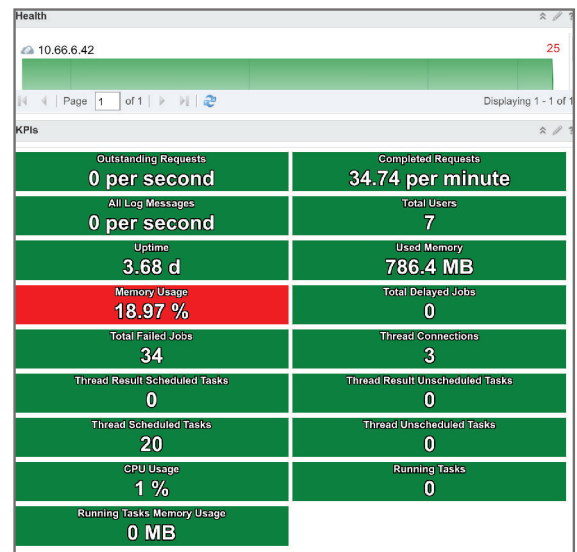

Centralize your infrastructure monitoring by leveraging your existing investment in vRealize Operations.

See More with Operational Dashboards

The Management Pack for Pivotal Cloud Foundry enhances VMware vRealize Operations Manager by adding eight dashboards, including:

- **PCF Overview.** Displays heat maps depicting the overall health of Pivotal Cloud Foundry resources.
- **PCF Health Investigation.** Select an alert to see key performance metrics for objects.
- **PCF Environment.** Select a Pivotal Cloud Foundry object to view metrics related to performance, health and resource use.
- **PCF Diego.** View key performance metrics, health and relationships for Pivotal Cloud Foundry Diego for multiple components within the system.

Harness the Power of Metrics to Analyze Health

View alerts, health, status, and relationships for Pivotal Cloud Foundry resources to gain a broad picture of your entire system. Pinpoint the source of issues with at-a-glance views of over 400 key metrics like used memory, dropped messages, and thread connections to plan expansion and consolidation with confidence.
