VMware vRealize Operations
Management Pack for
Oracle Database
About Blue Medora

Blue Medora & VMware have partnered to expand the reach and capabilities of the VMware vRealize Cloud Management suite

Blue Medora has worked in the enterprise application performance monitoring space for over 8 years with companies like Oracle, IBM, and New Relic
How Blue Medora complements vRealize Operations

VMware provides best-of-breed management for vSphere via vRealize Operations
How Blue Medora complements vRealize

Blue Medora’s software extends VMware vRealize Operations across the entire stack.
Extending vRealize Operations

Virtualization

Database

Compute

Network

Storage

Enterprise Apps
Connects directly via JDBC Thin Driver for metric collection

vRealize objects for key network resources

- Database
- Instance
- Query
- Tablespace

Relationship mapping between Oracle DB and the virtual layer
Relationships

Internal and external relationships provide database to virtual layer visibility
Combine application, virtual, network, compute and storage into a single view.
