1. Product Overview

The **Blue Medora VMware vRealize Operations Management Pack for SAP HANA** collects performance data from SAP HANA resources and makes it available within VMware vRealize Operations (vROps).

For more information on using the Management Pack, please see the *Blue Medora VMware vRealize Operations Management Pack for SAP HANA User Guide*, which can be found at: <http://support.bluedora.com>.

2. Product Version Information

VERSION	RELEASE DATE	DESCRIPTION
6.2.10200005	January 20, 2017	Updated release for vRealize Operations 6.2+
1.0	July 31, 2014	Initial General Availability release for vCenter Operations

3. Applicable Platforms

For details, see the *Blue Medora VMware vRealize Operations Management Pack for SAP HANA Installation & Configuration Guide*, which can be found at: <http://support.bluedora.com>.

4. Notable Features

The Management Pack for SAP HANA is optimized for VMware vRealize Operations 6.2+ with features such as:

- **3 comprehensive monitoring dashboards:**
 - SAP HANA Environment
 - SAP HANA Host Details
 - SAP HANA Overview
- **9 high-level views—and 2 corresponding reports**—including performance and utilization for SAP HANA resources
- **250+ collected metrics** for SAP HANA resources
- **Key performance metrics** such as Average Core Utilization, Average Response Time, CPU Utilization, Jobs Processed, Log Utilization, Read Size, and Write Size
- **Detailed alerts and notifications** imported from the SAP HANA API
- **Capacity definitions** for vRealize Calculated CPU, Data Space, Physical Memory, Swap Space, Virtual Memory, and more

5. Installation Prerequisites & Instructions

For detailed information on installing and configuring the Management Pack, please see the *Blue Medora VMware vRealize Operations Management Pack for SAP HANA Installation & Configuration Guide*, which can be found at: <http://support.bluedora.com>.

6. Known Issues/Limitations

The Management Pack does not support IPv6. This is a limitation of the `ngdbc.jar` library by SAP.

You can find the most up-to-date technical documentation on the Blue Medora support site at: <http://support.bluemedora.com>.

The Blue Medora website also provides the latest product updates. If you have comments about this documentation, submit your feedback to: support@bluemedora.com.
