

VMWARE VREALIZE OPERATIONS MANAGEMENT PACK FOR Lenovo Network

vmware®
PARTNER

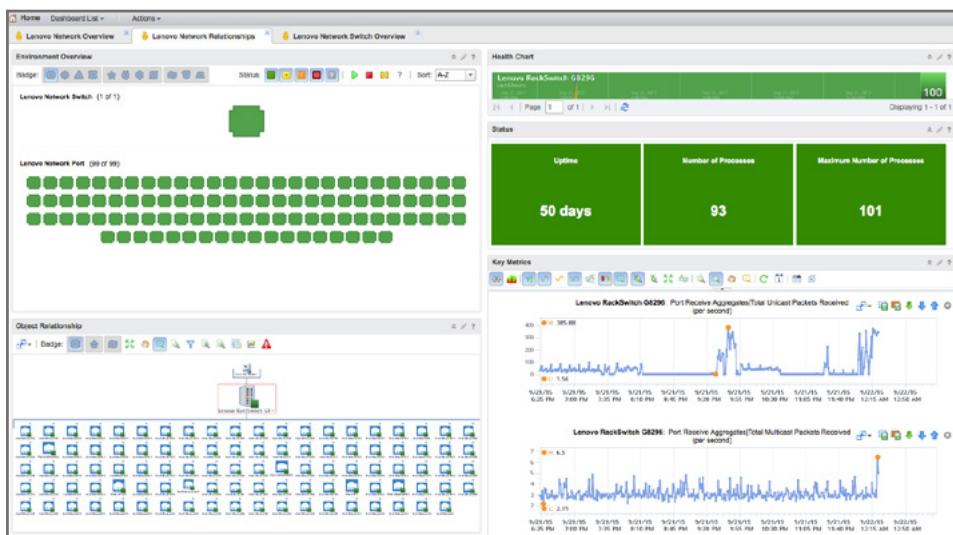

TECHNOLOGY
ALLIANCE

Lenovo

The Blue Medora Management Pack for Lenovo Network collects performance data from critical Lenovo Network resources and makes it available within the VMware vRealize Operations (vROps) monitoring platform.

Extend vRealize Operations to Lenovo

The Blue Medora vRealize Operations Management Pack for Lenovo Network extends VMware vROps by enabling customers to gain comprehensive visibility and insights into the performance and health of their Lenovo Network workloads running on VMware.

With the Management Pack for Lenovo Network, administrators are able to manage, monitor, and troubleshoot their entire Lenovo Network environment within a single console. The Management Pack for Lenovo Network monitors Lenovo rack switches remotely. It connects via SNMP v2c to Lenovo Network hardware to retrieve data regarding resources.

Expose Key Lenovo Performance Metrics in vRealize Operations

- Bytes received
- Bytes transmitted
- Port speed (bandwidth)
- Unicast/multicast/broadcast packets received & transmitted
- Inbound packet discards
- Outbound packet discards

Supported Platforms

vROps
(Advanced or Enterprise Edition)
Version 6.x

Lenovo
SNMP v2c

Additional platforms are added periodically. Visit bluemedora.com for the most up-to-date platform support.

KEY ADVANTAGES

- **End-to-end visibility.** Identify potential issues in your Lenovo networking environment before they spread to the next layer of the stack.
- **Machine learning capabilities.** Extend vRealize Operations' capabilities to Lenovo Network devices.
- **Be proactive.** Stay ahead of issues in your Lenovo Network environment with vROps' predictive analytics.
- **Relationship mapping.** Instantly view relationships within Lenovo, out to the virtual layer and beyond.
- **Alerting.** View Lenovo Network alerts directly within vROps based on symptoms detected in your environment.

AVAILABLE NOW

This management pack is now available for purchase. Learn more and download a fully supported trial at bluemedora.com.

VMWARE VREALIZE OPERATIONS MANAGEMENT PACK FOR Lenovo Network

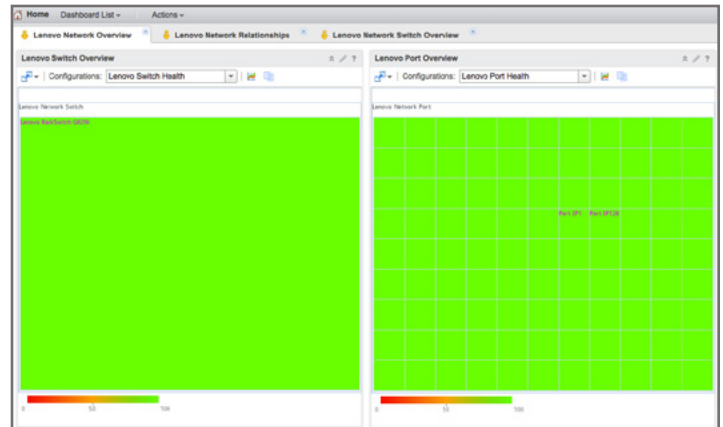

Centralize your infrastructure monitoring by leveraging your existing investment in vRealize Operations.

See More with Operational Dashboards

The Management Pack for Lenovo Network enhances VMware vRealize Operations Manager by adding the following capabilities:

- **Operations Dashboard.** Provides at-a-glance views into health, risk and efficiency of your virtualized as well as non-virtualized Lenovo Network infrastructure.
- **Workload Details View.** Get in-depth analysis of what is impacting performance and health of Lenovo Network workloads.
- **Proactive Smart Alerts.** Automated root cause analysis provides advanced notification of building issues with Lenovo Network environments before end users are impacted.
- **Heat Map Views.** Get visibility into Lenovo rack switches and ports to identify resource constraints and bottlenecks.

Analyze Health and Relationships

View alerts, health, status, and relationships for various Lenovo Network resources to receive a broad picture of your entire system. Understand your Lenovo Network workloads today and prepare for tomorrow.
