

VMWARE VREALIZE OPERATIONS BUNDLE FOR FlexPod

The Blue Medora VMware vRealize Operations (vROps) Bundle for FlexPod allows you to monitor your Cisco Nexus switch, Cisco UCS server, and NetApp volume performance data all from within vRealize Operations.

Extend vRealize Operations for Increased Visibility

The Blue Medora Bundle for FlexPod extends VMware vRealize Operations by enabling customers to gain comprehensive visibility and insights into the performance and health of their Cisco UCS, Cisco Nexus, and NetApp Storage workloads running on VMware.

Using the Bundle for FlexPod, administrators are able to manage, monitor, and troubleshoot their entire environment within a single console. The bundle consists of three Blue Medora Management Packs and out-of-the-box dashboards, allowing for visualization of your FlexPod all within VMware vRealize Operations.

Supported Platforms

vRealize Operations
(Advanced or Enterprise Edition)
Version 6.x

NetApp OnCommand Unified Manager
(Advanced or Enterprise Edition)
Versions 5.1, 5.2, 6.x+

Cisco Nexus
1000 - 9000 Series via SNMP v2c

Cisco UCS Manager
Version 2.1+

Additional platforms are added periodically. Visit bluemedora.com for the most up-to-date platform support.

KEY ADVANTAGES

- **End-to-end visibility.** Identify potential issues in your FlexPod environment before they spread to the next layer of the stack.
- **Machine learning capabilities.** Extend vRealize Operations' capabilities to FlexPod.
- **Up-to-the-minute status and health awareness.** Stay ahead of issues with vROps' predictive analytics. The bundle provides alerts, views, and reports to fully exploit vRealize Operations 6.x.
- **Relationship mapping.** Instantly view relationships between FlexPod resources.
- **Alerting and recommendations.** View FlexPod alerts and expert recommendations directly within vROps for faster solutions.

VMWARE VREALIZE OPERATIONS BUNDLE FOR FlexPod

Centralize your infrastructure monitoring by leveraging your existing investment in vRealize Operations.

See More with Operational Dashboards

The vROps Bundle for FlexPod enhances VMware vRealize Operations Manager by adding the following dashboards:

- **Overview Dashboard.** Provides at-a-glance views into the health of your FlexPod infrastructure.
- **Investigation Dashboard.** Get in-depth analysis of what is impacting performance and health of FlexPod workloads.
- **Alerts Dashboard.** Health status and events are pulled from FlexPod resources and displayed in vRealize Operations as alerts.

Analyze Health and Relationships

View alerts, health, status, and relationships for various FlexPod resources to receive a broad picture of your entire system. Understand your current workload with at-a-glance views of key metrics like memory capacity and CPU to plan expansion and consolidation with confidence.
