

# VMWARE VREALIZE OPERATIONS MANAGEMENT PACK FOR MongoDB

The Blue Medora Management Pack for MongoDB collects performance data from critical MongoDB resources and makes it available within the VMware vRealize Operations (vROps) monitoring platform.

## Extend vRealize Operations to MongoDB

The Blue Medora vRealize Operations Management Pack for MongoDB extends VMware vRealize Operations by enabling customers to gain comprehensive visibility and insights into the performance, capacity, and health of their workloads running on MongoDB.

With the Management Pack for MongoDB, administrators are able to manage, monitor, and troubleshoot their entire MongoDB environment within a single console. The Management Pack for MongoDB monitors MongoDB systems remotely. It connects directly to the Mongo Client to retrieve data regarding MongoDB databases and their performance.

## Expose Key MongoDB Performance Metrics

- Operations Counters
- Asserts
- Replication Operations
- Connections
- Network
- Counters
- Indexes
- Page Faults
- Extents

## Supported Platforms

**vRealize Operations**  
(Enterprise Edition Only)  
Version 6.x

**MongoDB**  
Software Versions 3.x+

*Additional platforms are added periodically. Visit [bluemedora.com](http://bluemedora.com) for the most up-to-date platform support.*

## KEY ADVANTAGES

- **End-to-end visibility.** Identify potential issues in your MongoDB environment before they spread to the next layer of the stack.
- **Alerting capabilities.** Reduce MTTI with alerts and detailed recommendations.
- **Relationship mapping.** Instantly view relationships within MongoDB, out to the virtual layer and beyond.
- **Out-of-the-box dashboards.** Plan database expansion and consolidation with confidence, with at-a-glance views of network utilization and connections capacity.

**AVAILABLE NOW**

This Management Pack is part of the True Visibility Suite for VMware, and is available for purchase. Download a fully supported trial: [bluemedora.com/free-trial](http://bluemedora.com/free-trial).

# VMWARE VREALIZE OPERATIONS MANAGEMENT PACK FOR MongoDB

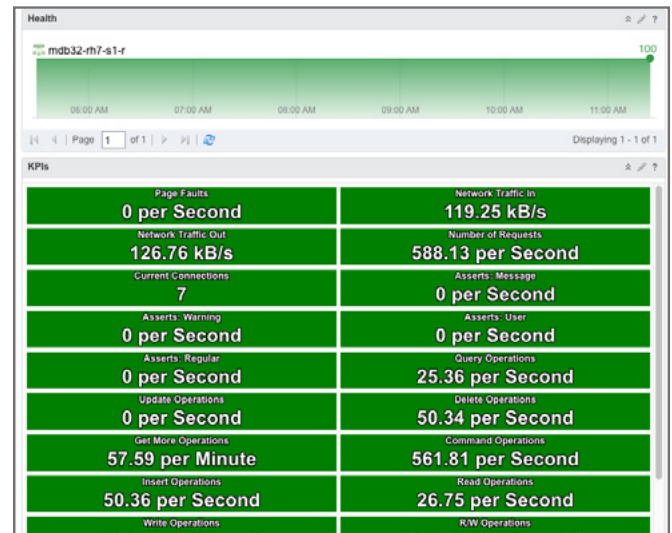

Centralize your infrastructure monitoring by leveraging your existing investment in vRealize Operations.

## See More with Operational Dashboards

The Management Pack for MongoDB enhances VMware vRealize Operations Manager by adding the following dashboards:

- MongoDB Overview
- MongoDB Environment
- MongoDB Mongos Instances
- MongoDB Databases
- MongoDB IOPS
- MongoDB Health Investigation
- MongoDB Replica Sets
- MongoDB Mongods

## Harness the Intelligence of vRealize

The Management Pack for MongoDB collects over 450 MongoDB metrics including health, availability, and performance. Synthetic metrics like MongoDB capacity, health, KPIs and resource overviews provide unique insights that are exclusive to the Management Pack. Every metric provided can be used in out-of-the-box custom reports and available to schedule daily, weekly, or monthly email delivery.

The screenshot displays the vRealize Operations Manager interface with several dashboards open. On the left, there's an 'Alert Selector' and a 'Topology' view showing a network diagram of MongoDB instances. The main area shows a 'Health' dashboard for 'shard0002' with a green status bar and a 'KPIs' section with various metrics. A prominent alert is shown: 'Mongod Journaling Disabled' with a yellow star icon. The alert message states: 'This alert indicates that an immediate alert was raised in MongoDB.' Below the alert, there are 'Recommendations' and 'What is Causing the Issue?' sections. The 'Alert Information' section on the right provides details: Object Name: mdb32-win12, Control State: Open, Assigned User: -, Alert Type: Application, Alert Subtype: Configuration, Status: Active, Impact: Risk, Criticality: Warning, Start Time: 7/21/16 3:38 PM, Update Time: 7/21/16 3:38 PM, and Cancel Time: -.
