

Xen Hypervisor

The Blue Medora vRealize Operations (vROps) Management Pack for Xen Hypervisor provides insight into the health, availability and status of Xen Hypervisor workloads in a single console.

Extend vRealize Operations to Xen Hypervisor

With the Blue Medora vRealize Operations Management Pack for Xen Hypervisor, gain essential insight into critical resources with access to performance data. Access hundreds of key performance metrics in out-of-the-box dashboards and reports for clear visibility into how Xen Hypervisor workloads are performing on VMware.

Leverage relationship mapping within the management pack to easily navigate your environment and view relationships among resource kinds, like Xen Hypervisor virtual storage network and compute resources, and enable quick drill-downs to root-cause issues. In turn, administrators can manage, monitor and troubleshoot their entire Xen Hypervisor environment within a single console.

Expose Key Xen Hypervisor Performance Metrics in vROps

- CPU/Memory Storage
- Storage/Networking IOPS
- Storage Network Throughput
- Storage Capacity
- Power State

Supported Platforms

vRealize Operations
(Advanced or Enterprise Edition)
Version 6.2+

Xen Hypervisor
Xen Project Hypervisor 4.7+
environments running libvirt 2.1.0+

Additional platforms are added periodically. Visit bluemedora.com for the most up-to-date platform support.

KEY ADVANTAGES

- **End-to-end visibility.** Identify potential issues in your Xen Hypervisor environment before they spread to the next layer of the stack.
- **Alerts and recommendations.** Access detailed alerts and recommendations to pinpoint issues as they arise.
- **Capacity and health awareness.** Gain deep insight into performance and health of Xen Hypervisor workloads with out-of-the-box dashboards and reporting capabilities.
- **Relationship mapping.** Instantly view relationships within Xen Hypervisor, out to the virtual layer and beyond.

AVAILABLE NOW

This management pack is now available for purchase. Learn more and download a fully supported trial at bluemedora.com.

VMWARE VREALIZE OPERATIONS MANAGEMENT PACK FOR

Xen Hypervisor

vmware
PARTNER

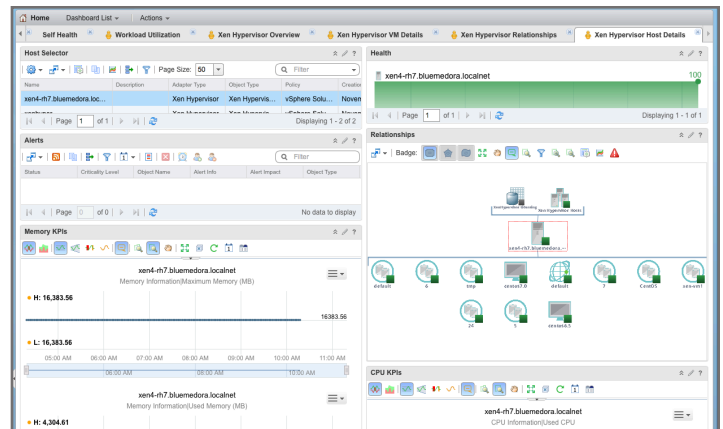

TECHNOLOGY
ALLIANCE

Centralize your infrastructure monitoring by leveraging your existing investment in vRealize Operations.

See More with Operational Dashboards

The Management Pack for Xen Hypervisor enhances VMware vRealize Operations Manager by adding the following capabilities:

- **Xen Hypervisor Overview.** Get a quick view of the overall health of your Xen Hypervisor resources with at-a-glance heatmaps.
- **Xen Hypervisor Relationships.** Gain insight into key performance metrics, health and relationships for Xen Hypervisor resources.
- **Xen Hypervisor Host Details.** Select a Xen Hypervisor host to view alerts, memory, health and relationship information.
- **Xen Hypervisor VM Details.** See alerts, key metrics, health and relationship information about a specific Xen Hypervisor Virtual Machine.

Analyze Capacity and Performance Trends

The Blue Medora Management Pack for Xen Hypervisor includes capacity definitions, extending the predictive analytics of vROps Analysis Badges to clearly understand capacity and utilization breakdowns for Xen Hypervisor virtual machines and host systems. As a result, gain essential insight into the health, status and relationships for Xen Hypervisor resources and workloads.
