

Monitor Everything with BindPlane for Google Cloud Logging

Google Cloud Logging customers can now streamline their logging to monitor on-premises, multi-cloud or hybrid environments with BindPlane Logs.

When setting up a log monitoring solution, the process of configuring and maintaining the log collection solution is challenging and time-consuming. Up until now. Need a solution to quickly integrate your log data into Google Cloud Logging? BindPlane Logs from Blue Medora allows Google Cloud Logging customers to quickly stream logs from on-prem systems, multi-cloud and hybrid environments in a secure and reliable way.

Realize Value Quickly and Centralized Collection Management

The numerous pre-configured collection sources available thru BindPlane provide the quickest way to connect to and send log data into Google Cloud Logging. Beyond getting the right data flowing quickly, the BindPlane solution also offers the following advantages for managing your data collection deployment after your initial setup:

- Centralized interface to manage all log agents
- Templates to make large deployments easy
- View all deployed agents and their health from one location
- Fast and easy installation through a one-line CLI installer
- 24/7 BindPlane customer support is available for Google Cloud Logging customers

50+ Preconfigured Log Sources

Many of your customers already rely on BindPlane to connect Google Cloud Platform to metrics from 175 technologies that support on-prem, cloud, and hybrid workloads. BindPlane now includes log monitoring that supports over 50 log types fully supported and integrated with Google Cloud Logging.

These include log types such as:

- Oracle, MySQL, PostgreSQL, IBM DB2, MS SQL Server and additional databases
- vSphere, AWS Cloudwatch
- Active Directory and Windows Events
- Tomcat, NGINX, MS IIS, Cassandra, and other application/web servers
- F5 Networks, Palo Alto Networks, Cisco networking solutions
- Gitlab, Jenkins, Jetty, Puppet
- Kubernetes, Docker Swarm, Amazon EKS

BindPlane will rapidly expand its logging capabilities to support over 100 log types by the end of the year.

Google and Blue Medora - Trusted Partners

Google and Blue Medora have built a strong offering in the monitoring space with Google Cloud Logging and BindPlane. The integrations we have developed over that time allow for a quick and seamless ingestion of metric and log data from BindPlane into Google Cloud Logging. This partnership allows the BindPlane solution to be available to Google Cloud Platform customers at no additional charge or licensing from Blue Medora, so you can quickly realize value from the extended log monitoring capabilities of BindPlane.

Monitor Key Workloads and Multiple Clouds Using BindPlane Logs with Google Cloud Logging

- Database
 - MS SQL Server
 - Oracle
 - PostgreSQL
 - MySQL
- Platforms
 - AWS Cloudwatch
 - Azure Log Monitor
 - vSphere
- Enterprise Applications
 - SAP
 - Tomcat
 - Cassandra
- Security
 - OKTA
 - MS Active Directory
